CSCE 242 – Project Part 1: Topic Selection

Portia Plante

18 January 2026

### **Name**

“Sean’s Featured Recipes”

### **Topic Description**

My topic is a recipe website that holds my favorite and most interesting recipes. I want to have detailed recipe pages with pictures and instructions. I will include pictures of my results (or expected results if I haven’t made the recipe yet). Recipes will have a comment section where users can add reviews and suggestions (I will need to store data here). I want to introduce myself on a home page and include any specialties that are my favorite. I also am open to trying new recipes so I will have a section where users can submit recipes and if they are good, I can add them to the page. Finally, I want my page to have a professional but also fun style where everything is written in detail, pictures are high quality, and recipes are precise.

### **Unique Pages**

- Home page (description, welcome, etc.)
- Recipe list page
- Recipe page(s)
- About me & contact me
- Picture portfolio for the recipes
- Submit a recipe page

### **Stored Data**

- store reviews corresponding to each recipe
- Login info for users
